

Company History

FLOWER FRAMERS™ by Jay was founded in 1994 by Jay Korte and is headquartered in Cincinnati, Ohio. **FLOWER FRAMERS™** brings the nostalgic beauty of Old World streetscapes into neighborhoods and communities all across the U.S. and beyond! Jay, who is a passionate gardener himself, was inspired by the beautiful flower boxes adorning windows and balconies throughout Europe. So, he decided to reintroduce the concept of window boxes to American gardeners using better technology and construction.

He started working on the concept in the early 1990s and has perfected the system over the years, while also adding additional accessories to create a nearly maintenance-free flower box gardening experience. Not only have **FLOWER FRAMERS™** been a favorite with home gardeners, they've also been discovered in the commercial sector. They now embellish tourist destinations across America including resorts, hotels, cafes and amusement parks. In addition, architects, revitalization experts and planners have added them to historic districts and planned communities.

FLOWER FRAMERS™ are, simply put, the best flower box system on the market. It meets the professional or personal gardener's needs like no other product before. As we continue to grow, we are expanding our line of window box styles and accessory products. **FLOWER FRAMERS™** are sold directly to homeowners through our Web site and phone orders, through independent garden centers in the Ohio, Kentucky and Indiana, and upscale gardening catalogs.
