

Product Features & Benefits

FLOWER FRAMERS™ by Jay are "THE ULTIMATE FLOWERBOX" because they require very little maintenance. What used to be a wooden box with a limited life and poor drainage, is now a joyful gardening experience with our product. Our flower boxes have a lifetime guarantee and are quality constructed for nearly maintenance-free gardening.

Main features include:

- Maintenance-free fiberglass construction
- Full 9" root depth; 8.5" width
- Standard lengths 2 to 15 ft. long
- Custom sizes available up to 20 feet
- Foolproof drainage
- Paintable to match house color or trim
- 30 year guarantee
- Never hand water again! Micro-irrigation watering accessories available

Drainage

FLOWER FRAMERS™ are made of durable, lightweight fiberglass and molded with a concave bottom that channels water to the sides and out through drain holes in the end caps. A 1" x 8" mesh pad is provided to protect the plant's roots and prevents over watering. This combined system has proven to be extremely beneficial in producing lush, healthy plants in a window box gardening environment.

Installation

They are easy to hang on any surface or structure using any the various hardware and brackets we have available:

- wood, vinyl or aluminum siding
- brick, masonry or stucco
- porch, deck or wrought iron railings and fences

Irrigation accessories

FLOWER FRAMERS™ offers a top European brand drip irrigation accessory so the flower boxes can water themselves! This micro-irrigation accessory allows a more pleasurable window box gardening experience because of less maintenance time needed for hand watering. (More information on watering accessories is available on the enclosed 11x17 installation sheet.)
